

A statement on events that occurred today.

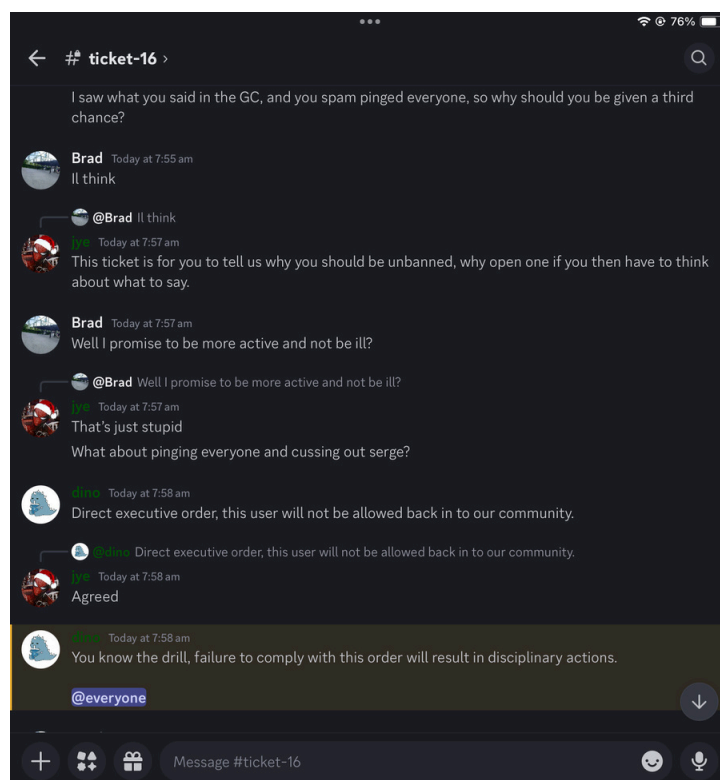

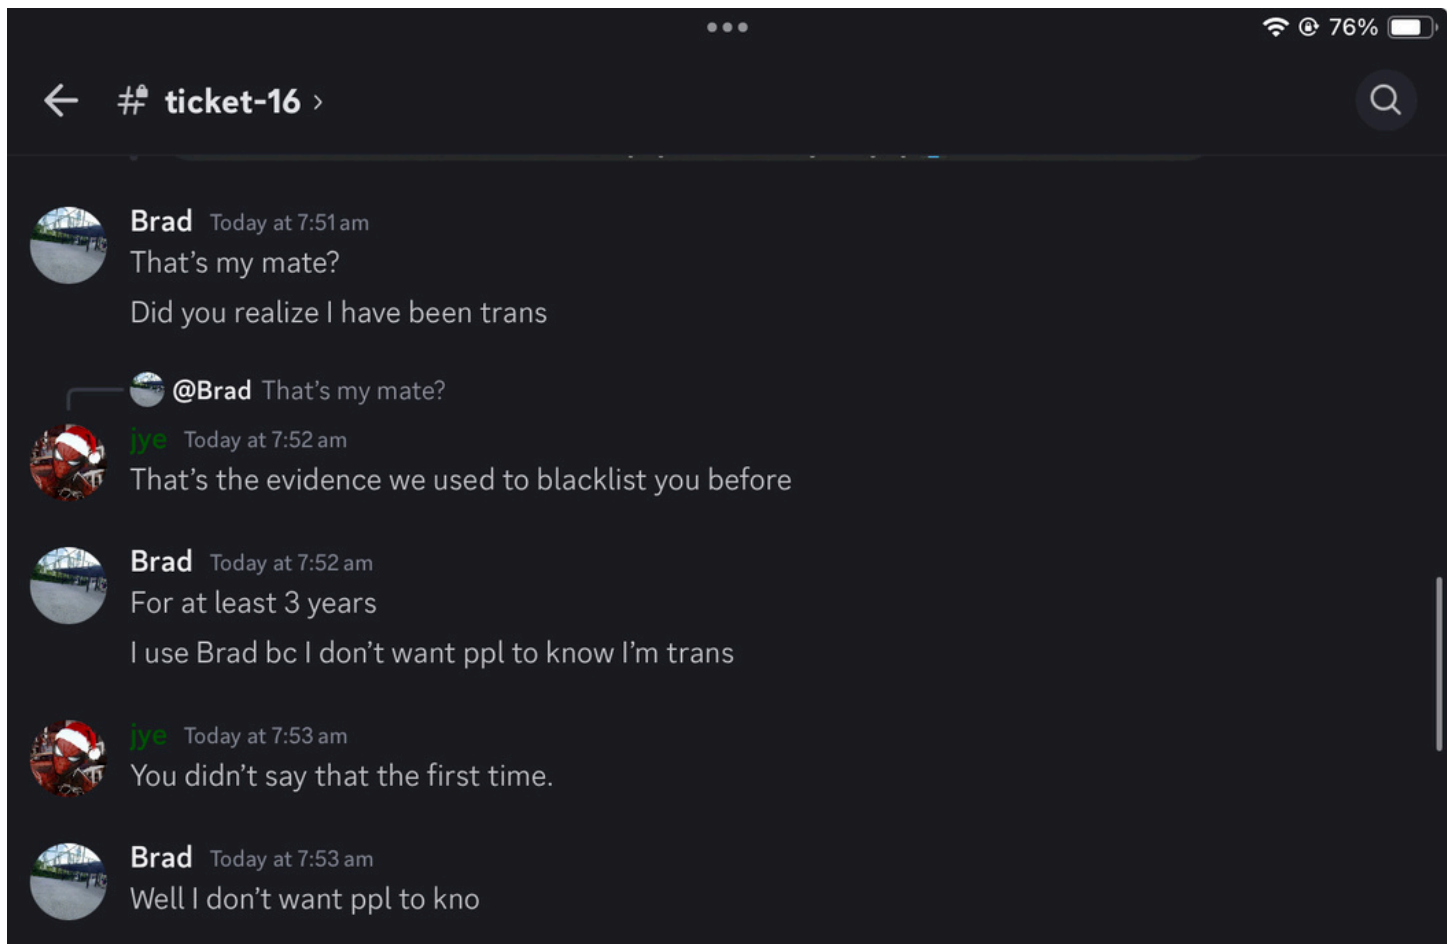

24th of December, 2024

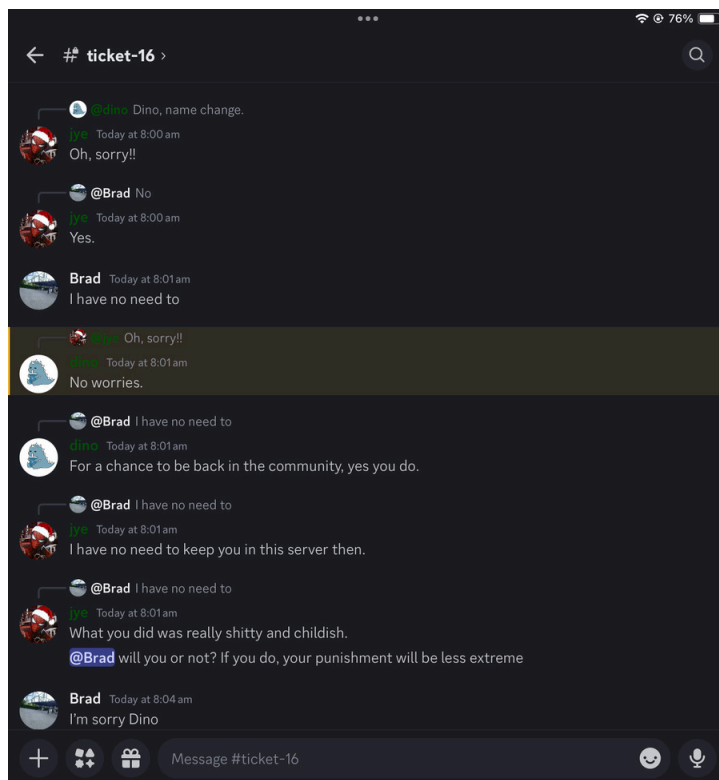

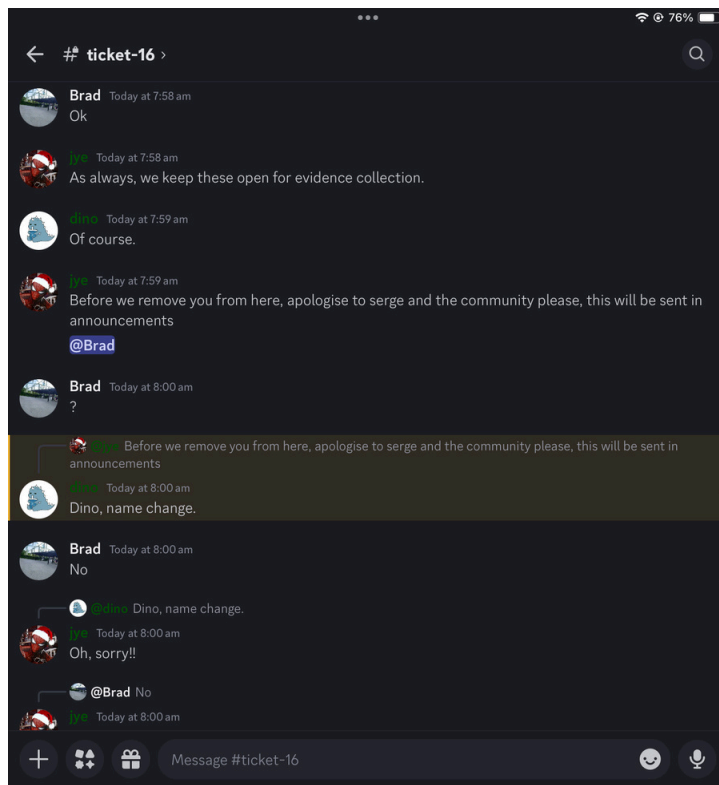

Good Evening, today I will address the events that took place earlier today. A former member of the staff team got confronted for their activity in our server, then he cussed one of our CEOs out. I was then told by that staff member to remove his role, which I did. I had to sign in to my alternate discord account to remove his perms, we have a "*" role which gives you admin perms. The user was here from the start, as our former CEO, but when our current CEO came around, he was demoted to COO, which made him mad. He then went into the announcements channel, and started pinging @everyone, he did this 3 or 4 times, which made myself, Dino and Dan very angry, so I then banned him and sent him the reason for his ban, which is our protocol. He then tried to appeal, I will show the transcript at the bottom. I am very disappointed in the user who pinged @everyone, he apologised to everyone, but this is not tolerated. He will not be let back into the community. **We also suspect that the user is Under Thirteen.**

Signed, Jye
CEO of Airbound
